

LSD HEDGEMASTER RANGE

The perfect platform for work, indoors and out

- ◆ As easy to use as a step ladder, but much safer
- ◆ Secure guard rail that leaves both hands free
- ◆ Aluminium construction – will not rust or corrode
- ◆ Lightweight, stable and very strong
- ◆ Platform heights up to 11' 6"
- ◆ Supplied fully assembled and folds flat for storage
- ◆ Works on slopes and will straddle flower beds, ditches and dwarf walls
- ◆ Articulated foot spreads load and stops legs sinking into soft ground
- ◆ Three year guarantee

LADDER SAFETY DEVICES

THE HEDGEMASTER range of work platforms covers a standing height of 2'6" to 11'6" and has been designed to work effectively and safely in the garden and around the home. They are built to a very high standard using aluminium, which makes them extremely strong, lightweight and corrosion free.

They have guardrails at each side and the front guardrail is adjustable. It can be fixed in one of two positions to suit the user, thus improving safety. A sprung button locks the guardrail into the required position. The platform itself is very stable and is made of "Rhino-board" which is extremely durable and has a non-slip surface.

Each of the three models has four legs which are individually adjustable over a range of 24" in increments of 1/8", which allows it to cope easily with uneven ground. Each leg has a 5 1/2" diameter articulated foot which spreads the load and prevents it from sinking into the ground.

The rungs are grooved to provide a non-slip surface and the position of the bottom, 'floating' rung, is adjustable to take into account the required height of the platform.

Each HedgeMaster is supplied fully assembled and folds flat for storage.

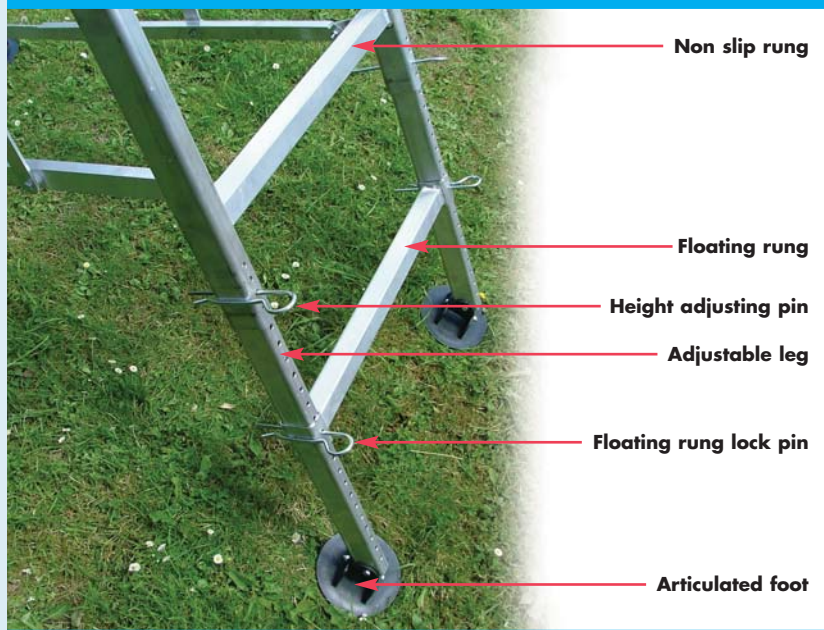

There are three models available and for each model we offer a height extender, which can be fitted without tools.

THE COMPACT

The COMPACT has a working platform height of 2' 6" to 4' 6".

The COMPACT Height Extender provides an increase in height of 2' giving a working platform height range of 4' 6" to 6' 6" and a shoulder height of approximately 11' 6".

THE CLASSIC

The CLASSIC has a working platform height of 4' 6" to 6' 6".

The CLASSIC Height Extender provides an increase in height of 3' giving a working platform height range of 7' 6" to 9' 6" and a shoulder height of approximately 14' 6".

THE PROFESSIONAL

The PROFESSIONAL has a working platform height of 6' 6" to 8' 6".

The PROFESSIONAL Height Extender provides an increase in height of 3' giving a working platform height range of 9' 6" to 11' 6" and a shoulder height of 16' 6".

HEDGEMASTER DIMENSIONS

SAFE WORKING LOAD 150kg/330lbs

	HIGHEST	78	81

HedgeMaster Professional with Extender

The HedgeMaster provides the safest means of trimming hedges but it can also be used for any work around the home, office, factory, village hall, school and orchard.

It is ideal for clearing gutters, painting windows, soffits and fascias and any general maintenance work.

COMPLIANCE

The HedgeMaster range is manufactured to comply with the requirements of the General Product Safety Regulations of 1994.

Manufacturers and distributors of access equipment complying with the relevant British Standard or HSE requirements

“Can I extend the height of my HedgeMaster?”

Yes – many of our customers do (and it can be done whenever it suits you). The Extender unit is sold separately and can be purchased at any time.

Professional with Extender

MANUFACTURE

All our products are manufactured in our own factory in Chiddingly, East Sussex and you are welcome to visit the factory at any time, but please give us a day or so's notice.

You are also welcome to collect your order and save on delivery costs.
